About Us

Grow India Naturals is a trusted cultivator, supplier, and exporter of premium-quality, 100% Natural, Pure, and Organic agricultural products from India. We specialize in serving global B2B buyers with sustainably sourced, farm-fresh food products.

Rooted in self-cultivation and direct farmer partnerships, we offer a diverse portfolio including Spices, Herbs, Millets, Legumes (Pulses), Oil Seeds & Vegetable Oils, Honey, Pickles, Rice (Basmati & Non-Basmati), Tea, Fruits, and Vegetables.

Our cultivation and sourcing also include high-grade Chilli, Garlic, Coriander, Fenugreek, Soybean, Fennel, Turmeric, Ginger, Groundnuts, Flaxseed, Mustard Seeds, Rice (Basmati & Sarbati), Millets, Cereals, and Seasonal Produce.

We are proudly ISO 9001, ISO 22000, ISO 14001 Certified, FSSAI Licensed, Organic Certified, GFSI Compliant, and KOSHER & FDA Certified — ensuring adherence to the highest global standards of quality, safety, and sustainability.

At Grow India Naturals, our focus is on quality, traceability, and eco-friendly practices, connecting India's agricultural excellence with global markets seeking authenticity and consistency.

Vision, Mission & Goal

- Vision: To be a global leader in exporting India's finest natural and organic food products.
- Mission: To deliver premium-quality, sustainable agri-products while empowering farmers worldwide.
- Goal: To expand globally with consistent quality, sustainable farming, and long-term partnerships.

Quality Assurance

We have a formalised system of four stages to carefully Cultivate & Export all our products to complement the needs of our clients.

When We Purchase

Stage 1 - Farm visits

The process of quality check starts right from the farm. We have a dedicated team that goes on farm visits throughout India and interacts with farmers to obtain their opinions on the quality of soil and suitable weather conditions for new crops.

The second stage involves the procurement of raw materials. All basic materials are acquired with immense care from either the market or directly from the farmers.

Stage 3 - Processing and packaging

Stage 2 - Raw material acquisition

Next, we have a team of specialists wholly for processing, packing and loading. Throughout the procedure we are extremely alert to make sure no extraneous matter are spotted in our cargo.

Stage 4 - Shipping

Finally, for the shipping process we use third party certification and also in house checklists to inspect every container we use to ship the cargo. All containers are thoroughly checked to meet the food safety standards before transportation.

When We Cultivate

Stage 1 - Soil Preparation & Sowing

We test and improve soil using organic fertilizers, then plow it for sowing. High-yield, disease-resistant seeds are planted at the right depth and spacing.

Stage 2 - Crop Management & Growth

Crops are irrigated using drip, sprinkler, or flood methods. Weeds are removed manually, and organic pesticides are used. Natural fertilizers like cow dung manure and neem cake enhance growth.

Stage 3 - Harvesting & Sorting

Crops are harvested manually or mechanically at peak maturity. Highquality produce is sorted and graded for export.

Stage 4 - Cleaning, Packaging & Storage

Harvested crops are cleaned, sun-dried if needed, and packed in moisture-proof, export-grade bags. They are stored in temperature-controlled warehouses until shipping.

"Quality

At Grow India Naturals, quality is our top priority. We are committed to 100% natural and organic standards, ensuring that every product meets the highest quality benchmarks. To maintain this, we conduct regular lab tests and obtain necessary certifications for all our shipments. Additionally, we offer customized weight and quality reports based on client requirements, providing complete transparency and assurance.
